

Programming Concepts - Assignment 1

Description:-

Horse Betting 365 is a small-sized company located in the east of Mauritius. It allows customers to place bets on four races: race1, race2, race3, race4. Each race has 4 horses participating in the contest. Customers are allowed to bet on any race they wish. They must choose only one winning horse for a race and place their bet.

The horses participating in the different races are listed in the table below:-

Race Number	Horse Name
Race 1	Noble Salute
	Sea Warrior
	Lines of Power
	Shamooka
Race 2	Le Turbo
	Copa Moorgen
	Gaetan Duval
	Robbie Beckham
Race 3	Pamella FookYune
	Tania Diolle
	Stanley Ramgoolam
	Veroni Leclezio
Race 4	Yasine Emamdee
	Arnaud Lemalin
	Sanjay Peroumal
	David Brazzers

If customer wins the first race, his bet for the first race is doubled.

If customer wins the second race, his bet for the second race is tripled.

If customer wins the third race, his bet for the third race is quadrupled.

If customer wins the fourth race, his bet for the fourth race is quintupled.

Tasks:-

You are required to design and implement a java program using the above description given.

Make use of JOptionPane input dialogs, message dialogs, variables, expressions and control structures only.

No use of methods and/or arrays.

No use of data files and/or database connectivity.

Your java program must be as interactive as possible using the JOptionPane input & message dialogs.

A few screenshots is given below to help you design your java software.

Submission:-

You must submit/upload both your java program and the assignment report in the google classroom section week 7.

The assignment report must contain the code and screenshots of your running software.

The demo/presentation/viva will be conducted in Lab G1.2 Wed 12 Jun 2024.

Submission Deadline date: Wednesday 12 Jun 2024

Marking Criteria:-

Criteria	Marks
Use of variables & expressions	30
Use of JOptionPane input & message dialogs	25
Use of control structures	35
Project report	10
Total	100
